Course:	SISE v3.0 - Implementing and Configuring Cisco Identity Services Engine
Duration:	5 Days

Description:

The **Implementing and Configuring Cisco Identity Services Engine** (SISE) v3.0 course shows you how to deploy and use Cisco Identity Services Engine (ISE) v3.x, an identity and access control policy platform that simplifies the delivery of consistent, highly secure access control across wired, wireless, and VPN connections. This hands-on course provides you with the knowledge and skills to implement and use Cisco ISE, including policy enforcement, profiling services, web authentication and guest access services, BYOD, endpoint compliance services, and TACACS+ device administration. Through expert instruction and hands-on practice, you will learn how to use Cisco ISE to gain visibility into what is happening in your network, streamline security policy management, and contribute to operational efficiency.

Implementing and Configuring Cisco Identity Services Engine

Objective:

Upon completion of this course, you will be able to:

- Describe Cisco ISE deployments, including core deployment components and how they interact to create a cohesive security architecture. Describe the advantages of such a deployment and how each Cisco ISE capability contributes to these advantages.

- Describe concepts and configure components related to 802.1X and MAC Authentication Bypass (MAB) authentication, identity management, and certificate services.

- Describe how Cisco ISE policy sets are used to implement authentication and authorization, and how to leverage this capability to meet the needs of your organization.

- Describe third-party network access devices (NADs), Cisco TrustSec®, and Easy Connect.

- Describe and configure web authentication, processes, operation, and guest services, including guest access components and various guest access scenarios.

- Describe and configure Cisco ISE profiling services, and understand how to monitor these services to enhance your situational awareness about network-connected endpoints. Describe best practices for deploying this profiler service in your specific environment.

- Describe BYOD challenges, solutions, processes, and portals. Configure a BYOD solution, and describe the relationship between BYOD processes and their related configuration components. Describe and configure various certificates related to a BYOD solution.

- Describe the value of the My Devices portal and how to configure this portal.

- Describe endpoint compliance, compliance components, posture agents, posture deployment and licensing, and the posture service in Cisco ISE.

- Describe and configure TACACS+ device administration using Cisco ISE, including command sets, profiles, and policy sets. Understand the role of TACACS+ within the authentication, authentication, and accounting (AAA) framework and the differences between the RADIUS and TACACS+ protocols.

- Migrate TACACS+ functionality from Cisco Secure Access Control System (ACS) to Cisco ISE, using a migration tool.

Implementing and Configuring Cisco Identity Services Engine

Prerequisites:

It is recommended, but not required, to have the following skills and knowledge before attending this course:

- Familiarity with the Cisco IOS® Software command-line interface (CLI)

- Familiarity with Cisco AnyConnect® Secure Mobility Client

- Familiarity with Microsoft Windows operating systems

- Familiarity with 802.1X

Who Should Attend:

- Network Security Engineers

- ISE Administrators

- Wireless Network Security Engineers

- Cisco Integrators and Partners

Implementing and Configuring Cisco Identity Services Engine

Outline:

- Section 1: Introducing Cisco ISE Architecture and Deployment
- Section 2: Cisco ISE Policy Enforcement
- Section 3: Web Auth and Guest Services
- Section 4: Cisco ISE Profiler
- Section 5: Cisco ISE BYOD
- Section 6: Cisco ISE Endpoint Compliance Services
- Section 7: Working with Network Access Devices

Lab Outline

- Discovery 1: Access the SISE Lab and Install ISE 3.x
- Discovery 2: Configure Initial Cisco ISE Setup, GUI Familiarization, and System Certificate Usage
- Discovery 3: Integrate Cisco ISE with Active Directory
- Discovery 4: Configure Cisco ISE Policy
- Discovery 5: Configure Guest Access
- Discovery 6: Configure Guest Access Operations
- Discovery 7: Create Guest Reports
- Discovery 8: Configure Profiling
- Discovery 9: Customize the Cisco ISE Profiling Configuration
- Discovery 10: Create Cisco ISE Profiling Reports
- Discovery 11: Configure BYOD
- Discovery 12: Blacklisting a Device
- Discovery 13: Configure Cisco ISE Compliance Services
- Discovery 14: Configure Client Provisioning
- Discovery 15: Configure Posture Policies
- Discovery 16: Test and Monitor Compliance Based Access
- Discovery 17: Test Compliance Policy
- Discovery 18: Configure Cisco ISE for Basic Device Administration
- Discovery 19: Configure TACACS+ Command Authorization
